

AIRPORT ECONOMIC IMPACT STUDY

The Nevada Airport Economic Impact Study (AEIS) evaluated the economic impacts of all system airports in Nevada. The components that comprise the total economic impact of Nevada's aviation system and the economic impact of 0L9 are presented below. These components include on-airport direct impacts as well as multiplier impacts generated throughout Nevada through re-spending and supplier purchases. Visit the NDOT website to learn more about the methodology used to determine the statewide and airport-specific economic impacts.

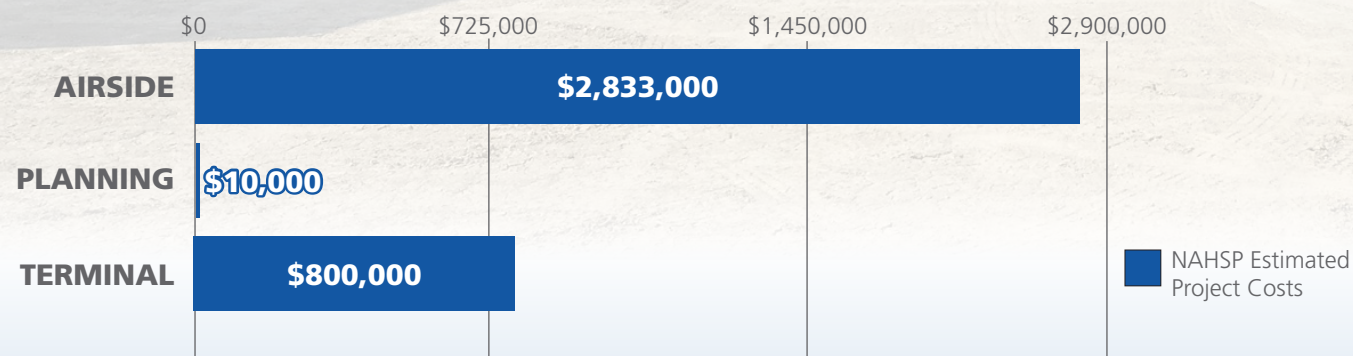

AIRPORT OVERVIEW

Echo Bay Airport (0L9) is a general aviation (GA) airport located in Clark County, 14 miles south of Overton and 40 miles east of Las Vegas. The facility has a 3,400-foot-long asphalt runway along with a taxiway and small apron. 0L9 has an average of around 500 operations annually, with the vast majority being GA operations. These operations include recreational flying along with flight training and instruction. Echo Bay Airport also experiences military training flights on rare occasions. 0L9 is located directly west of the Overton Arm of Lake Mead Recreational Area, offering on-airport fly-in camping. Providing campgrounds and a boat launch ramp, Echo Bay is a popular location for weekend vacationers and campers.

0L9 INVESTMENT NEEDS

NAHSP Estimated Project Costs were developed by summing the estimated costs of project recommendations from the NAHSP FSO and PM analysis. Airside needs include runway, taxiway, apron, NAVAIDS and lighting; landside needs include fuel, hangars, and ground transportation; pavement maintenance includes runway, taxiway, and apron pavement rehabilitation projects; planning needs include airport diagrams and terminal needs include utility connections. Costs were developed as planning level estimates only and do not include the level of detail needed to design projects or prepare grants.

ECHO BAY AIRPORT 0L9

The 2022 Nevada Airport and Heliport System Plan (NAHSP) and Airport Economic Impact Study (AEIS) are critical documents to the Nevada Department of Transportation (NDOT) Aviation Program. Combined, these are used to provide guidance and direction on how to maintain the aviation system, monitor performance, and invest in the future.

NAHSP Process:

- Establish goals and project metrics
- Determine existing system performance
- Identify future performance targets
- Outline policy and project recommendations

NAHSP Roles:

- Seven functional classifications used in the NAHSP
- 0L9 is an Backcountry airport (not eligible for Federal Aviation Administration [FAA] funding)

Critical Services:

- Offers Pilot Amenities and Recreational Opportunities
- Supports Military Operations

Backcountry airports: Recreational use airports not utilized on a regular basis for another specific access purpose.

FACILITY AND SERVICE OBJECTIVES

Airports not included in the FAA's system were evaluated using a set of Facility and Service Objectives (FSOs). FSOs establish a minimum level of facilities and services recommended based on each airport's NAHSP role. FSOs help guide development at an airport level to ensure that each airport has the facilities and services recommended to fulfill their role within the system. The results of this evaluation are presented as an Airport Development Report included in this brochure's centerfold. The Airport Development Report clearly indicates the FSOs that the airport is meeting and not meeting.

ECHO BAY AIRPORT

The Airport Development Report presents a snapshot of NAHSP objectives for the airport and current performance. In areas where the objective is not met, a development project may be recommended, as appropriate, for the airport to achieve the desired objectives in this table.

Category	Facility & Service Objective	NAHSP Objective (Minimum)	Current Performance	Meets Objective?
 Regional Significance	Longest Runway	> 3,000 Feet	3,400 Feet	Meets
	T-Hangar Ratio	> 0.25	No Based Aircraft	Meets
	Fuel Availability	None	None	Meets
	Instrument Approach	Visual	Visual	Meets
 Airport Facilities	FAA Design Standards	Meet FAA Design Standards	Yes	Meets
	Runway Surface Type/Condition	Non-Paved and Fair	Asphalt and Good	Meets
	Runway Lighting	None	None	Meets
	Taxiways	Turn Arounds or Hold Pads	Turn Arounds	Meets
	Visual Aids	Wind Cone	Wind Cone	Meets
	Weather Reporting	None	None	Meets
	GA Terminal	Public Restrooms Desired	None	Doesn't Meet
	Utilities	Electricity and Water Available	None	Doesn't Meet
	Security/Wildlife Fencing	None	None	Meets
	Communications Connectivity	None	Cellular (Data/4G)	Meets
